Qty.1

Monitor Installation

Note: All VESA screws should be screwed tightly into 12 in-lb (1.4 N-m).

Step 1:
Install the 2 M4 screws in bag "B" to the I series 75*75 VESA area, do not fully tighten the screws, and place their tops at approximately 3/16 inch on top of the back of the I series.
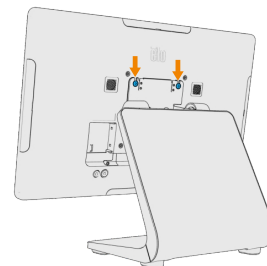

Step 2:
Remove the screws and remove the I series Cable Cover.

Step 3:
Slide the 2 screws in Step 1 into the VESA stand slot and tighten them.

Step 4:
Adjust the VESA Plate on the base to the appropriate position, as shown in the figure, then take 2 M4 screws from bag "B" and install them into the holes under the VESA and tighten the screws.
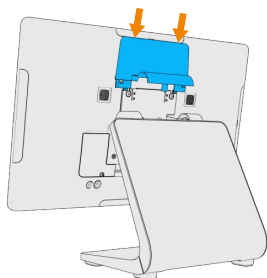

Step 5:

Connect the power and USB-C cables from the base to the I series, as shown in the figure, then restore the Cable Cover of the I series.

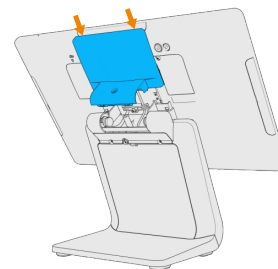

USB-C Cable

Power Cable

Step 6:

Rotate the screen to an appropriate position and slide the top VESA Cover to install it into the stand.

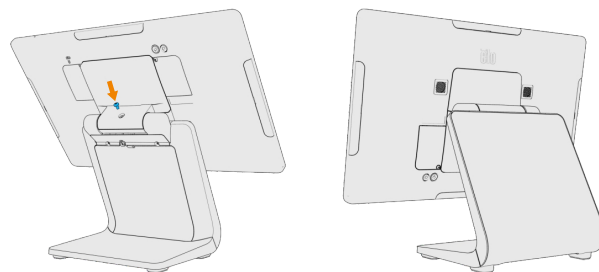

Step 7:

Turn the hinge and flip the I series to the back, then slide the VESA Cover at the bottom to install it onto the VESA stand.

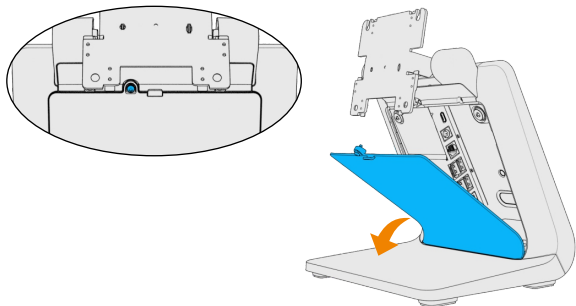

Step 8:

Fix the VESA Cover in place with the M4 screw in bag "A" to complete the installation and turn the monitor to a suitable position.

## CFD Installation (only for Z20 Gen2 15")

Step 1:
Loosen the screws and remove the cable cover door on the base.

Step 3:
Remove the screws and remove the Cable cover of CFD.

Step 2:
Remove the screws and slide it down to remove the front cover of the base.

Step 4:
Connect the USB-C cable as shown in the figure to install the CFD cable lamp.

Step 5:
Restore the CFD Cable cover.

Step 6:
Adjust the cable and pass it through the CFD cover cable hole, then lock CFD and the CFD cover together using 2 M4 screws from bag "C".

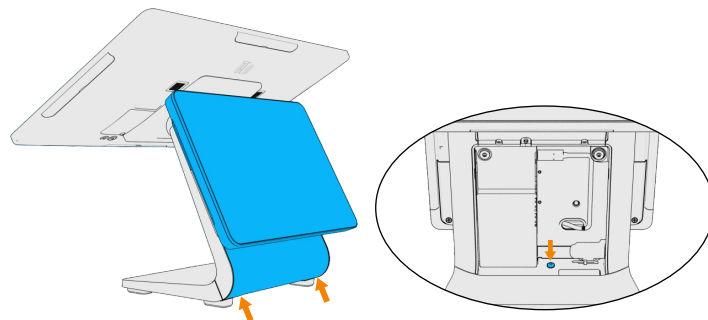

Step 7:
Adjust the cable and pass it through the cable hole on the base and connect USB-C to the base.

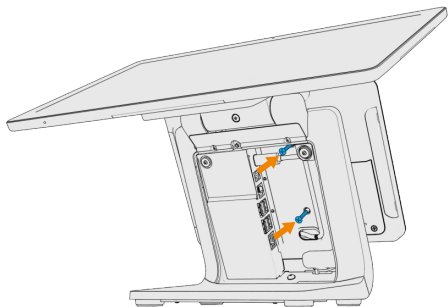

Step 8:
Slide the CFD Cover upwards to install it onto the base, then tighten the screws in Step 2.

Step 9:

Lock the remaining 2 screw holes using 2 M4 screws from bag "C".

Step 10:

Restore the base cable cover door.

Step 11:

Turn the screen to a suitable position to complete the installation, as shown in the figure.
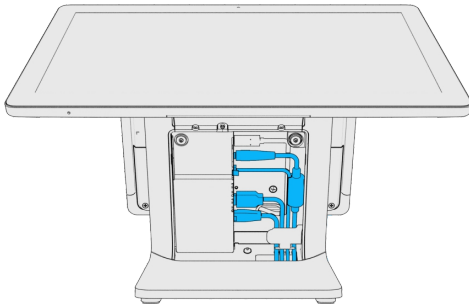

Cable Management

Step 1:
Loosen the screws and remove the cable cover door on the base.

Step 2:
Connect the power, LAN and external device to the base, and pass the cables through the hole at the bottom of the stand.

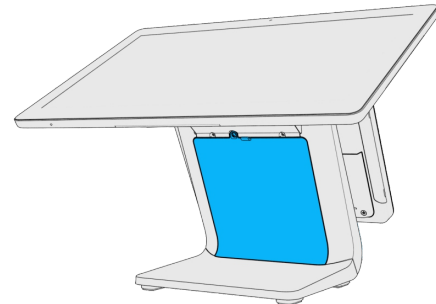

Step 3:
Fix the cables in place with the cable tie as shown in the figure.

Step 4:
Restore the cable cover door of the base to complete the installation.

Locking the Base

Note: Z20 Gen2 10" skip to Step 3 directly.

Step 1:
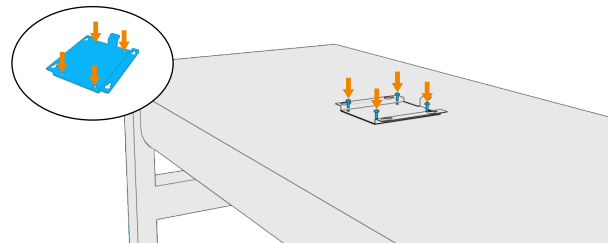

Remove the 4 screws and remove the base weight.

Step 2:

Re-install the 4 screws onto the base.

Step 3:

Fix the Base Plate onto the desktop through the four holes, as shown in the figure. (Choose the screws according to the material of the countertop.)
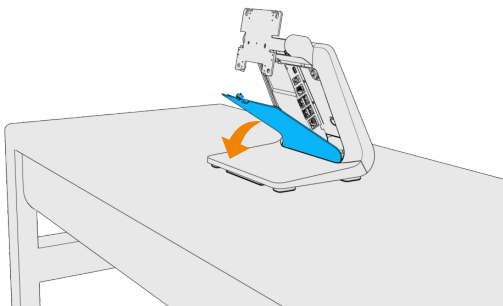

Step 4:

Place the base on the Base Plate and align the 4 screws in Step 2 with the 4 holes on the Base Plate, then slide the base backwards to lock the screws into the holes.
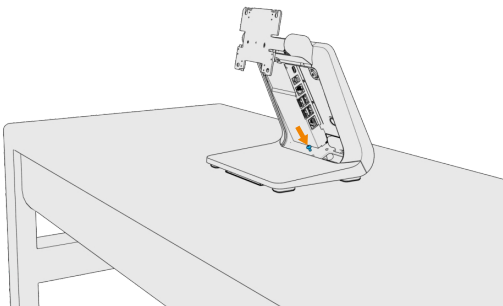

Step 5:
Loosen the screws and open the cable cover door on the base.

Step 6:
Tighten it with the M4 screw in bag "A" (Tighten with the M3 screw in bag "C" for Z20 Gen2 10").
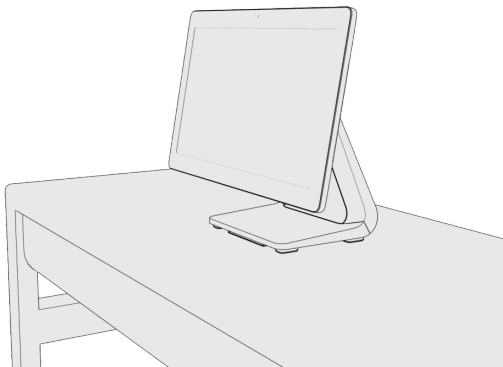

Step 7:
Restore the cable cover door of the base.

Step 8:
The base mesa is fixed and the installation is completed.
