Quick Installation Guide

Elo Webcam

Revision B
P/N E485251

Installation

Please go to www.elotouch.com/support to verify you have the latest drivers before installing this device.

Caution: Damage to the IDS Display can occur if the webcam is inserted with too much force. If the webcam connector does not mate with gentle insertion force, remove the webcam and reposition before gently trying to insert again.

Select the location to mount the webcam. Elo recommends the top location in either portrait or landscape orientation.

Note: The webcam will function in any location on the IDS Display but the video will need to be rotated using software if the webcam is not mounted on the top.

Remove the selected peripheral cover from the IDS Display.

Gently insert the webcam into the peripheral bay taking care to ensure the connector mates properly.

Install the 2 flat head screws included with the kit.

Do not adjust the webcam tilt without installing the screws or damage may occur.

Adjust the forward/back position of the webcam by loosening the two highlighted screws with the included 3mm allen wrench and sliding the webcam head forward as needed. Tighten screws when done.

Adjust the tilt angle of the webcam by loosening the highlighted screw and lifting up on the back of the webcam head. Tighten screw when done.
