

Interactive AI Agent

Power faster, more intuitive customer interactions with touch and voice AI.

Turn touchscreens into AI-driven experiences that listen, respond, guide, and transact. By combining touch and voice, interactions feel more natural while reducing friction for both customers and staff.

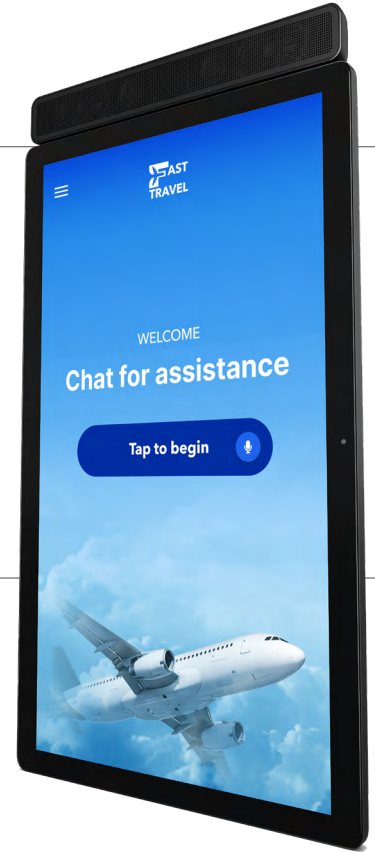

Key Features

- ✓ Commercial-grade Elo touchscreen
- ✓ AI Connect Bar with mic & speakers
- ✓ Software and payment-agnostic platform

Modern design. Natural interaction.

Elo's commercial-grade touchscreens paired with the voice-enabled AI Connect Bar support natural, multimodal interactions. Customers can start with voice to ask questions or make selections, then move seamlessly to touch to review options, refine choices, and complete actions—creating a more intuitive, guided experience from start to finish.

Built to adapt. Designed to scale.

From retail and quick serve restaurants to transportation and hospitality, interactive AI agents can be deployed in a variety of applications including:

- ✓ **Self-Checkout**
- ✓ **Drive-thru & self-order**
- ✓ **Directory & Wayfinding**
- ✓ **Ticketing & Check-in**
- ✓ **Endless Aisle**

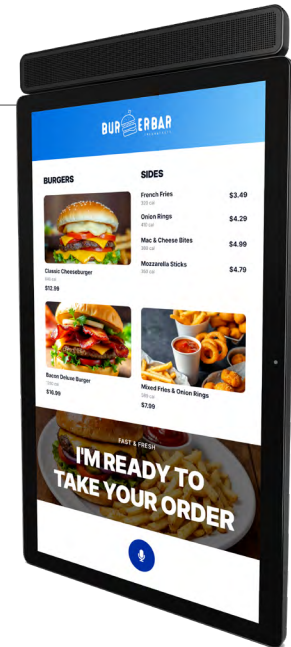

Retail

Guide shoppers to products faster with voice-assisted discovery and intuitive touch navigation. From item lookup and endless aisle to checkout, customers move seamlessly from browsing to purchase with less friction and more confidence.

Quick-serve restaurants (QSR)

Accelerate ordering with voice-enabled interactions paired with touch for order review and payment. Designed for high-volume environments, the experience improves accuracy, increases throughput, and keeps lines moving during peak hours.

Hospitality

Enhance guest journeys with voice- and touch-enabled interactions that streamline check-in, simplify wayfinding, and handle common service requests. Routine steps move faster, so staff can focus on welcoming guests and delivering more personalized service.

Built for Touch. Enhanced with Voice. Ready to Scale.

- ✔ **Touchscreens built for real-world use:** Elo touchscreens are purpose-built for customer-facing environments—engineered to withstand constant use and real-world conditions where reliability matters.
- ✔ **Voice-to-chat that works with touch:** The AI Connect Bar adds natural voice interaction directly to the display, allowing users to start with speech and continue seamlessly on-screen to review, confirm, and complete actions.
- ✔ **One solution, built to scale:** With EloView®, teams can deploy, manage, and update devices across locations from a single platform—maintaining consistent experiences without added operational complexity.
- ✔ **Freedom to build your solution:** Run the software, AI models, and payment applications you choose. Elo hardware supports your ecosystem without locking you into a single vendor or workflow.
- ✔ **Designed to evolve over time:** As voice capabilities, AI agents, and customer expectations evolve, the Elo platform evolves with them—protecting your investment long term.
