Flush Mount (zero bezel models)

Bracket shape and quantity varies for each model, drawing for illustration purposes only.

- For 3-bracket designs (see dimensional drawing for details):
1. Attach bracket "A" to touchscreen monitor (all four sides) with M4 screws (included).
 2. Attach bracket "C" to customer panel (all four sides).
 3. Attach bracket "B" to bracket "C" on all four sides with M4 screws (included).
 4. Adjust depth of bracket "B" so monitor is flush with customer panel.
 5. Place touchscreen monitor into customer panel opening.
 6. Secure touchscreen monitor to bracket "B" from behind with M4 screws (included).

For 2-bracket designs (12"-20" and 24" sizes), see dimensional drawing for details.

Side Mount (front bezel models)

Bracket shape varies for each model, drawing for illustration purposes only. See dimensional drawing for details.

Rear VESA Mount

A VESA-compliant mounting pattern for M4 screws is provided on the rear of the monitor. Pattern varies for each model. Drawing is for illustration purposes only. See dimensional drawing for details.

The VESA FDMI-compliant mounting is coded VESA MIS-D or MIS-E.

Cover Glass Installation

Elo Open Frame PCAP Touchscreens support protective cover glass. Cover glass must be installed with no air gap to the Touchscreen glass. Touch Thru mode must be enabled to use cover glass.

To enable Touch Thru mode:

1. Press the Menu button on the unit's tethered OSD Remote.
2. Navigate to Miscellaneous -> Touch -> Touch Thru.
3. Set to "On".
4. Add cover glass on top of touchscreen.
5. Power cycle the monitor.

If the cover glass is later removed, this feature should be set to "Off" and the monitor power cycled for the touchscreen to work correctly.

Problem	Troubleshooting
Monitor display is dim	<ul style="list-style-type: none"> - Use the OSD to increase the brightness &/or contrast. - 95, 96 Series: Also check if Thermal Protection Mode is active (there is a "Exclamation" mark on the Top Left corner of OSD main menu). See user guide for details.
Monitor display is blank	<ul style="list-style-type: none"> - If the Power Status LED is blinking, the monitor or Computer Module maybe in Sleep mode. Press any key / move the mouse / touch the touchscreen to see if the image reappears. - Check that there are no loose cable connections.
Monitor image looks strange or is displaying an "Out of Range" message	<ul style="list-style-type: none"> - Adjust your computer's resolution/timing mode to be within the allowable timing ranges specified for your touchscreen display. - Use the Auto Adjust function in the OSD.
Touch functionality doesn't work	<ul style="list-style-type: none"> - Verify your PC has the latest Elo drivers installed. - Perform the calibration routine provided with the Elo drivers. - If the OSD buttons or power button does not respond, check to see if the OSD lock or power lock functions is on.
Can't wake on touch	<ul style="list-style-type: none"> - Check to see if the OSD Touch on Sleep function is disabled.
Only supports two touches at a time	<ul style="list-style-type: none"> - Check to see if the OSD Touch Thru function is on.
